taflu X

Twin Amber Flashing Unit
featuring **i gen** technology

Configurations

- Key Operated
- Bluetooth Timer
- Magnetic Wand
- Cloud Based
- Variable Timer
- Power Consumption 4.2W
- Master Slave Function

Body Material - 5mm thick black ABS

Lens material - 3mm thick clear polycarbonate

Access - Hinged rear with anti-vandal fixings

Flasher - Reliable Solid State

Lights - 2 X 48 LED lamp cluster

IP Rating - IP64

IK Rating - IK10

Smarter Environment, Smarter Working, Smarter Technology

i gen was conceived with the aim to provide cost effective smart solutions, giving flexibility and the capability to keep pace with the evolving demands of smart cities.

Unlike other CMS systems **i gen** provides additional functionality with its Smart Bus allowing custom features to solve individual challenges. Our cloud based monitoring dashboard has leveraged expertise by utilising proven technology and experience in conjunction with the Hill & Smith Group, plus additional bespoke features developed within the Mallatite team. Our market leading technology offers real-time monitoring and data logging of your assets.

i gen INTELLIGENT, INTERACTIVE & TOTAL CONTROL.

FAULT REPORTING

CLOUD BASED

RTC

CALENDAR

HARDWARE

i gen technology can be accessed using a device that features a compatible Internet browser such as laptops, smart phones and tablets. This remote connection allows the user to communicate with traffic products. This is perfect for programming traffic safety equipment in areas such as schools where varying terms and times apply. This enables office based smart working, reducing the costs and removing health & safety concerns when teams are required onsite for maintenance of street furniture. Should a fault occur a notification either by text or email will be sent to the nominated user to alert them should urgent action be required.

i gen is also the foundation for new products such as the taflu X and will provide the backbone of Mallatite future developments beyond the normal traffic products, providing fully integrated solutions.

If you would like to find out more or to arrange a visit from our specialist **i gen** consultants. Please visit our website or contact us on the details below

Think **Smart**, Work **Smart**, Stay **Safe**.
