Health & Safety Interactive Signage

Each individually **designed** unit can feature a **warning** or informative message to suit the intended environment. The unit can be set to trigger upon **movement** within the area, either by vehicle or personnel to highlight a potential **hazard**. This can include areas where **PPE** is essential or the **interaction** of where vehicles and **personnel** meet.

The units are ideal for use within **manufacturing, warehousing** and **distribution** centres. It can have many applications that feature **text, images** or a combination of both.
